

The Lower Mekong Initiative Workshop

Ha Noi, August 18-22, 2014

Bio.

- Nguyễn Hồng Quân (PhD., TU Braunschweig, Germany; MsC., ITC Twente, the Netherlands)
- Institute for Environment and Resources (IER), founding member of Vietnam National University of Ho Chi Minh city, Vietnam

IER

Interests

- Hydrology (up-stream catchment and urban)
- Water – related issues: water pollution, flooding
- Integration of database, remote sensing, GIS and modeling in DSS
- Scale issues (temporal and spatial)
- Uncertainty and Uncertainty communication
- Inter-disciplinary study (collaborations)

Barriers

- lack of data (hydro, meteo., satellite),
- Data uncertainty
- Equipments for field measurement (quantity vs. quality, manual vs. automatics, remote control)
- Lack of collaborators from other disciplines

Expectations

- Learning from others
- Networking (collaboration opportunities)
